why Glen-Gery

To homeowners, builders, contractors, architects, designers and all in the influence chain, Glen-Gery is the preeminent provider of engineered hard surface solutions for interior and exterior applications with the largest, most aesthetically diverse and technologically superior offering.

As an industry leader for more than 125 years, Glen-Gery is a manufacturer of brick and stone products, holds the patent for Thin Tech®, the most advanced masonry support system ever designed, and is a distributor of exterior/interior building products and accessories within the US and Canada.

The diversified product line includes more than 500 brick products, which are available in a wide-array of sizes, textures and styles including extruded, molded, glazed, klaycoat, handmade, thin brick and paving brick. The Glen-Gery stone line includes manufactured stone and natural stone available in full and thin units.

With 10 manufacturing plants and 10 company owned distribution locations supporting builders, remodelers, contractors, architects, designers and end-users, Glen-Gery is a key operating company within Ibstock PLC, UK.

larger brick = versatility & economy

Talawanda High School uses our Ravenna Titan with a false mortar joint. Maximize construction dollars by using large size brick from Glen-Gery. Brick in our upsized Viking, Saxon, Titan, Titan Plus, Double Titan and Double Titan Plus products deliver all the lasting grace of smaller size brick, while offering the utmost design flexibility and budget control.

customize colors

Our glazed and klaycoat brick offering allows customers to select virtually any color. Glen-Gery glazes are resistant to graffiti and abrasion, long lasting and fade resistant. Clear or colorless glazes can be applied to traditional brick. Our klaycoat line allows water vapor to pass through the face of the brick, making it breathable with a matte finish in a variety of colors. Have a color in mind? We'll create it!

custom blends & shapes

Penn State University (left) opted for a custom look by blending two molded products, 53-DD and 350-M, for their Eastview Terrace Dormitories, which houses more than 800 upperclass students across seven residence halls. The dormitories also have a number of arches made possible by standard and custom brick shapes.

Ask us about our custom blending and custom shape capabilities for more efficient builds: less cutting and less scrap means cost savings and faster installation!
